# THANK YOU FOR BEING A PART OF THE JIVA MOVEMENT

# ABOUT JIVA

Jiva Water Devices restore life energy in any clean water. Water that flows through the device achieves enhanced energy level and is at its most natural and nourishing state.

Jiva Water carries various properties that help heal our soil, which in turn leads to healthier crops and better yeild and minimises the usage of chemicals and fertilisers as well.

Jiva Water also helps the overall well-being of humans and livestocks.

# PEOPLE BEHIND THE MOVEMENT

Intrigued by the deeper mysteries of water, Dr Krishna Madappa studied the nonlinear aspects of water for over three decades. He sought to enrich people's lives and revive nature by enhancing the energy potential of water.

In 2016, Srinivasan Vitoba, a seasoned global entrepreneur joined Krishna, and the movement to revive water through ancient scientific knowledge was born.

They called it '**JIVA**'.

# NOMENCLATURE

Rivers are a major source of energy, purity and noursihment. We, at JIVA, have used this as inspiration and have named our devices after the ancient names of some of India's most nurturing rivers - Yam (Yamuna), Vipasa (Beas), Jahnavi (Ganga) and Dihanga (Brahmaputra)

# HOW JIVA WORKS?

Jiva Water Devices are made using advanced frequency encoding technology. These are frequency encoded with energy signatures of bio-minerals and equipped with quantum tunnel pathways and a deep trigger photon generator that restores the **Life Energy in Water**.

# BENEFITS IN FARMS

## BENEFITS FOR POULTRY

### Eggs

Lesser sulphurous odour

Rich protein yolk

### Chicken

Higher quantity of eggs

Lesser ammonia smell in pens

Higher protein value in chicken

Less fat growth

Greater immunity in chicken

Reduced mortality rate

## BENEFITS FOR ANIMAL HUSBANDRY

Healthier cattle – cows, goat, sheep

Higher quantity and quality of milk

Higher quantity of wool

Increased vigour and mating ability

Optimised water consumption

Improvement of health during pregnancy

## JIVA FOR FISHERIES

Healthier fish

Reduced mortality rate

Higher oxygen content in the water for breeding

Faster growth rate in fish

Nutritious tasty fish

Less toxicity concentration in fish

## JIVA FOR FLORICULTURE

Flowers have enhanced fragrance

Increased natural pollination

Cut flowers last longer

## JIVA FOR VITICULTURE

Healthier plant cell absorption

Juicy grapes with longer shelf life

More grapes per bunch

## JIVA FOR TERRACE GARDENS

Tasty and delicious fruits, vegetables and herbs

Quicker crop cycle

Higher quantity of yield

## JIVA FOR AQUAPONIC

Recycled water is richer in nutrients

Hence, requires lesser maintenance
